Introduction

We are delighted to present our latest extensive bespoke range of display items which will help promote your business.

Our hand made displays are made to your specifications in the colour, size and material of your choice, so we can produce a design that will cater for your exact requirements.

Our display pads are constructed with four components:

- The frame is covered in a fabric of your choice and colour
- The centre is padded and covered in a material and colour sympathetic to the frame colour
- The back clicks into the frame to form the pad
- A choice of free standing or rack fitting completes the display pad

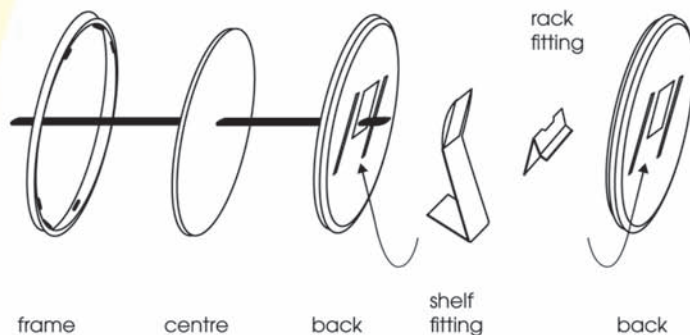

The beauty of this system is that the centres are easily replaceable in the event of damage or wear. They can also be interchanged to suit your own window display and is a cost effective way of creating seasonal or special displays.

We offer a full design service for all your window displays including extensive lighting options. Our bespoke service will cater for all your display needs and we look forward to working with you,

Patrick Kelly
Managing Director

Components

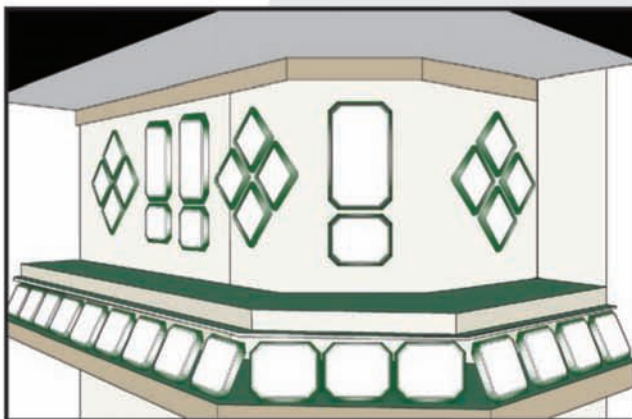

Bespoke service

We are more than happy to visit your premises to evaluate your shop fitting requirements and produce detailed designs outlining colours and materials to suit your taste. We then produce scaled drawings and detailed images illustrating our proposals. At this stage we can supply a detailed quotation. Following production, we will install your bespoke display.

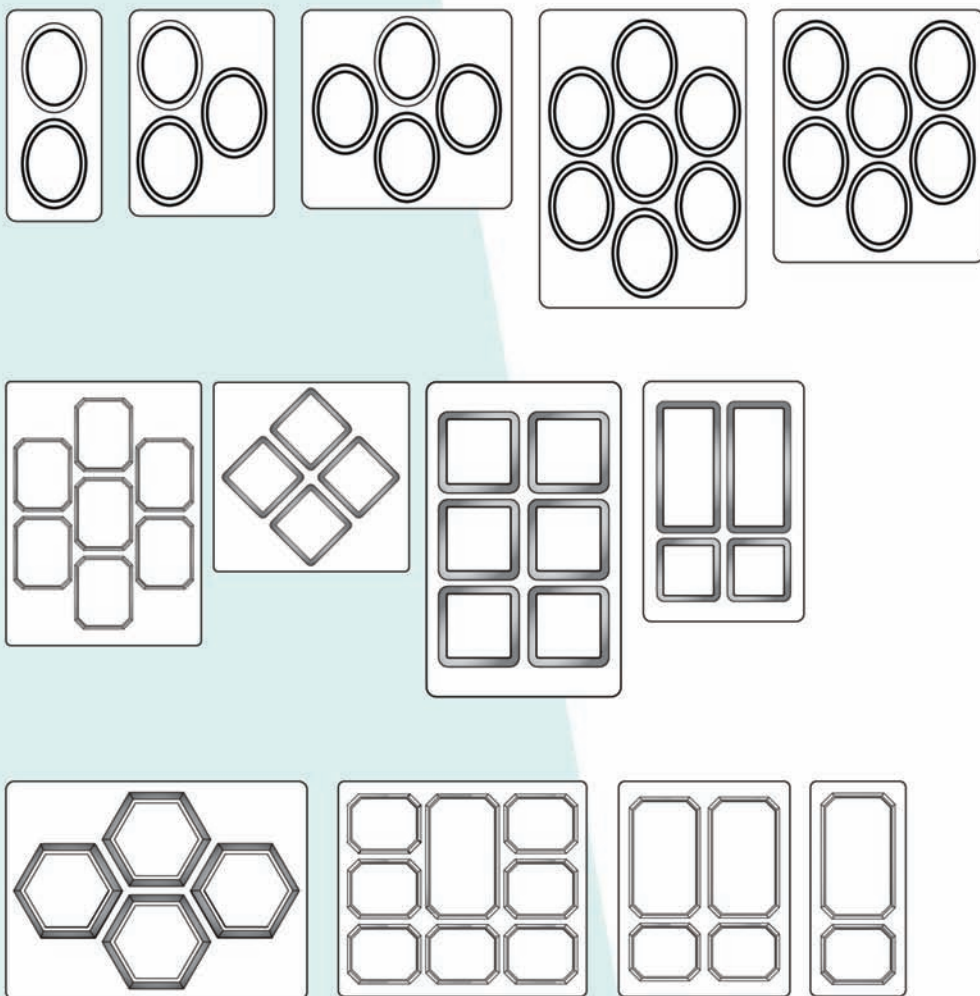

The drawing and photo below is an example of one of our designs and the final display.

Please contact us for a free quotation.

Module styles

The modules illustrated below are all located on one central pole, which can be ceiling mounted or fixed to the base of the window. Combinations of the modules can be used to create focal points within the display.

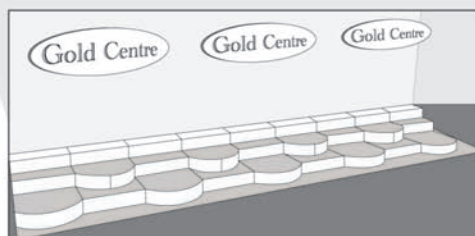

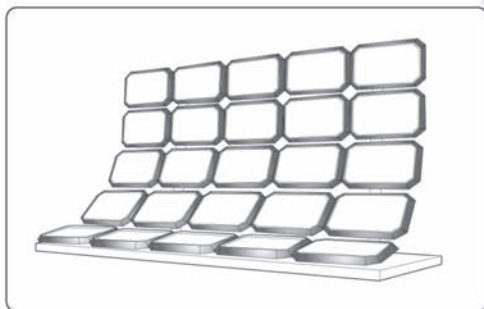

Module styles

Free-standing modules can be located on adjustable frameworks or on bespoke modules made to suit your window or cabinet size. They can be easily removed and almost any size can be manufactured. These modules will accommodate all styles of our display pads.

A series of risers intended to give height to free dress items, where no modular display is required. The vertical height has the option to feature a pelmet with signage, digital display systems or simply POS images.
